

# The Celebration of the Salt

On a table at the front, there will be two small vases/champagne flutes, each with a different *or* the same colored salt in them. And there will be a larger vase that is empty. During this Ceremony, each small vase will be poured into the large one to represent the uniting of the souls of the couple. It is said that if you are able to successfully separate the grains of salt, the covenant can be broken.

In biblical times contracts and covenants  
were sealed with Salt.

It was said that if you could separate your salt  
from your partner's salt  
then you could leave the contract or covenant.

Since this is impossible,  
This bind can never be broken.

(Party A and Party B each take their own salt and combine it)
